Art Unit: 1631

Claims 1-6 and 12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 7.

This application has been filed with informal drawings which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 7, 9-11 and 13-15 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by any one of Mirochnitchenko et al (J. Biol. Chem. 269: 2380 (1994)), Miyata et al (EP 0 532 380), or Inouye et al (EP 0 562 206). Each of the references discloses vectors for the *in vivo* production of single stranded antisense DNA utilizing a vector that contains a template for antisense DNA flanked by inverted repeats and employing a cloned RT gene for production of reverse transcriptase and thus, single stranded DNA. For example, see Mirochnitchenko et al "RESULTS AND DISCUSSION" section, Miyata et al, pages 4-10, and Inouye et al, pages 5-14. This rejection is repeated for reasons already of record (e.g., Office action mailed May 8, 2001, last full paragraph on page 1). Applicant does not argue the references in the manner in which they were cited in the rejection, but complains that the rejection is inadequate in explaining how the claims are anticipated. This argument is most unconvincing because the rejection is clear.

Claims 7, 9-11 and 13-15 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by, Miyata et al (U.S. 5,436,141). The reference discloses vectors for the *in vivo* production of single stranded antisense DNA utilizing a vector that contains a template for antisense DNA flanked by inverted repeats and employing a cloned RT gene for production of reverse transcriptase and thus, single stranded DNA. For example, see columns 5-14 and claims 1-45. This rejection is repeated for reasons already of record (e.g., Office action mailed May 8, 2001, paragraph bridging pages 1-2). Applicant does not argue the references in the manner in which they were cited in the rejection, but complains that the rejection is

inadequate in explaining how the claims are anticipated. This argument is most unconvincing because the rejection is clear.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Martinell whose telephone number is (703) 308-0296. The fax phone number for Examiner Martinell's desktop workstation is (703) 746-5162. The examiner works a flexible schedule and can be reached by phone and voice mail.
